

# Web Security Problem Solved

## Comodo Dome Secure Web Gateway Cloud-Based [Web Security](#)

A cloud-delivered Secure Web Gateway platform that includes revolutionary Portable File Containment, Valkyrie rapid file analysis, URL filtering, sandboxing and robust SSL MITM Interception.

### Cloud-Based Boundary Protection

Comodo Dome Secure Web Gateway is a revolutionary SaaS boundary protection platform that enables you to protect any user, on any device, in any location, all without installing any hardware or software.

Comodo Dome [Secure Web Gateway](#) sits in line between your users and the internet, protecting your enterprise from the latest cyber threats, while ensuring compliance with corporate content and access policies. You can now block web-delivered malware while monitoring your networks, user activity, mobile users and roaming devices from a single management console. Our proprietary portable containment technology eliminates the risk and time spent on remediation, as Dome Secure Web Gateway instantly blocks all malware while wrapping all unknown files in a lightweight, portable container before delivering them to the endpoint.

Dome Secure Web Gateway uses a Zero CAPEX security model, freeing up those resources for use elsewhere. It enables streamlined compliance and productivity control and features a true Default Deny Security Posture.

### Valkyrie

Comodo Dome Secure Web Gateway seamlessly leverages Comodo Valkyrie, our proprietary verdict based file analysis platform. Leveraging machine learning (AI), static and dynamic virtual sandboxing and even expert human analysis, Valkyrie provides a detailed and accelerated verdict for all unknown and zero day files. It powers Comodo Dome Secure Web Gateway with crowdsourced, global intelligence on good and bad files to identify and contain unknown threats before they can exploit your organization. Portable containment protects your network, keeping you and your environment safe from malware, while Valkyrie reaches a verdict on whether an unknown file is malicious—typically within 45 seconds—or five times faster than our nearest competitor.

# Comodo Dome Secure Web Gateway

## Features

### Advanced Threat Protection

- Secure Web Gateway
- Malicious content blocking
- Portable unknown file containment
- Botnet protection
- Crowdsourced threat intelligence

### URL Filtering

- 70+ categories and millions of URLs updated cloud-wide in real time
- Granular policies based on username, group membership or location

### Platform Features

- No hardware needed means no patching, updating or replacing
- Simple traffic forwarding
- Real-time and always inline
- Pay-as-you-go subscription model
- Eliminates backhauling
- No need to buy excess capacity—the Comodo Dome cloud scales elastically
- Global policy management
- Fully decrypts and inspects HTTPS web traffic

### Reports & Analytics

- Real time visibility into internet usage by user, group, device and location
- Customizable dashboards
- Comprehensive Analytics Engine
- Scheduled reporting

### Automated Unknown Portable File Containment

- Allows known good files
- Blocks known bad files
- Contains all unknown files
- Sends all files to Valkyrie for in-depth analysis

### Valkyrie Cloud-based File Verdict Platform

- Unknown file sandbox
- Static, dynamic and human analysis
- Forensic malware reports

### Delivers a Verdict for 100% of Executable Files and Malware Payloads

## About Comodo

The Comodo organization is a global innovator of cybersecurity solutions, protecting critical information across the digital landscape. Building on its unique position as the world's largest certificate authority, Comodo authenticates, validates and secures networks and infrastructures for individuals to mid-sized companies to the world's largest enterprises. Comodo provides complete [end-to-end security solutions](#) across the boundary, internal network and endpoint with innovative technologies solving the most advanced malware threats, both known and unknown. With global headquarters in New Jersey and branch offices in Silicon Valley, Comodo has international offices across Europe and Asia.
